

About PintARVR

PintARVR will be use AR and VR in android technology.

To display information of location and a 3D model of a building which help users to identify or recognize the structure, place and surrounding of the specific area of ICT Department (PUO)

PintARVR Ovbjective

To develop an alternative solution for student to find the location through virtual reality environment, real-time environment and 3D models.

To specify information about the surrounding building of the classroom becomes more interactive and digitally manipulable.

To provide a modern way of a combination between virtual and real objects to make the picture of the location of classroom more clear and precise to the student.
